PHIL
Barresi
MP

PARLIAMENT OF
AUSTRALIA
HOUSE OF
REPRESENTATIVES

To Whom It May Concern:

I strongly support the attached application by Lyrebird Media for funding by the Australian Film Commission.

Lyrebird Media is a highly innovative, professional and successful organisation that has a proven track record in the film industry.

This is demonstrated by the fact Lyrebird Media's owners and managers, Australian Producers/Directors, Maireid Sullivan and Ben Kettlewell are award winning filmmakers and composers, and virtuoso recording and performing artists, as well as internationally published writers. They share a long history of involvement in rewarding, stimulating, and creative projects from which the entire community benefits.

From their studio in North Ringwood, their company, Lyrebird Media, operates a world-class independent multimedia studio specializing in all aspects of film production and editing, including soundtrack composition and recording, and website development/hosting and graphic design.

Their scholarship impresses, and is the reason for the success of so many of their endeavours.

The documentary film "Liquid Light - the power of water" will present an artistic treatment on the transformative power of water in all its forms. This film will inspire compassionate confirmation of global humankind's critical relationship with water. "Liquid Light - the power of water" will explore salient examples of new, commercially efficient systems in water technology: and will support no less than a comprehensive paradigm shift of our current predominant attitudes towards water.

The impact of "Liquid Light - the power of water" will, at many levels, help enforce commitment to early action for the immediate need for increasing change to secure sufficient supplies of our most precious resource, water, both for today's people and future generations. With many parts of Australia facing severe water shortages, the topic of this production is timely and highly relevant.

Once again I would like to stress that I support Lyrebird Media's application for funding by the Australian Film Commission in the strongest possible terms and I ask that you give their application your fullest consideration.

I thank you for your time.

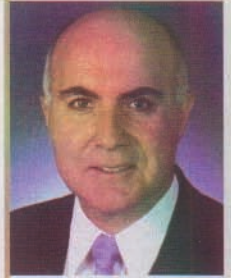

Yours sincerely,

Phil Barresi, MP
Member for Deakin
